

FRP Anti-Slip Catalogue

Non-Slip Safety Stair Nosing and Safety Accessories

About FRP

The unique characteristics of composites make them suited for an immense variety of uses, including the civil and public infrastructure, marine, aerospace, petroleum and many more.

At Terra Firma Industries, we're passionate about modern composite materials. That's why we developed our TerraGrate FRP range.

TerraGrate FRP (Fibre Reinforced Polymer/Plastic)

is lighter and stronger than equivalent traditional materials. As a result, FRP sheeting offers massive time and cost savings during installation and maintenance. TerraGrate FRP does not corrode, rot or burn and can be easily fabricated on site using common hand tools. It's perfect for use in exposed, corrosive and chemical environments to reduce costs and improve safety.

TerraGrate FRP offers a range of benefits over traditional materials:

Lightweight

Strong

Improved OH&S

Corrosion resistant

Fire resistant

Chemical resistant

Non-conductive

Slip resistant

Cost effective

Design friendly

Durable

Colour stable

Because FRP is made by combining a matrix of resins and fibres. The resins can be tailored to meet very specific requirements including chemical, electrical, fire or slip-resistance and the fibres can be chosen for different strength and flexibility ratings.

TerraGrate offers a full range of FRP products including walkway and platform mesh, support pedestals, handrails, stairs, anti-slip flooring, marine-grade walkway and structural profiles.

Anti-Slip Floor Plates

TerraGrate® FRP Non-Slip Floor Plates are manufactured from fibreglass reinforced polymer and include a hard-wearing, integrated, P5-rated anti-slip grit.

FRP anti-slip sheeting is chemical, fire and corrosion resistant and perfect for hazardous areas to reduce slip risk. Suitable for both indoor and outdoor applications and ideal for use in industrial, commercial and public spaces.

TerraGrate® Anti-Slip FRP sheeting can be easily secured onto most existing surfaces.

Its standard sheet thickness is 3.2 mm. As for non-standard sizes, thickness and colours are available on request.

Anti-Slip Stair Nosing

TerraGrate® FRP Non-Slip Safety Stair Nosing surface grit is specially formulated to exceed the highest P5 slip resistance rating under the AS/NZS 4586:2013 standard for pedestrian surface materials.

TerraGrate® high visibility, anti-slip, stair nosing can be customised to fit any sized step or stair. Hard wearing and durable it is ideal for use in high-traffic and wet environments including marine, industrial, commercial and public applications.

Ultra durable Fibreglass Reinforced Plastic (FRP), rigid stair nosing is UV stabilised and can be secured using adhesive, bolts or screws making it the perfect solution for any type of step.

Standard stock safety-yellow stair nosings are available in 25mm or 38mm deep and 75mm wide and in any length up to 3660mm. TerraGrate® nosings are also available for pre-order in widths up to 100mm and a variety of colours.
